

EIS Teleconference

Wednesday, 10th February 1999

EIS-meet-sdt-tc990210
tc990210.doc

Present: NRL: GAD, CK, JTM, ...
 MSSL: MWT, AJM

Mass Budget

Now sent to MSSL in report and spreadsheet form.
Requires inputs of UK elements.

Power

Discussion of peaks and average power.
Need more J-info on available power specs.

Thermal

Effect of earth-shine.

CCD

Is a frame-transfer device possible?

Other Topics

What happens during eclipse season?
Will Solar-B take a vacation?

Defocussing

How will this work? Discussion led to idea of calibration lap, e.g. 3500nm – giving similar penetration depths as EUV.

- ask Chris to look into this.

Systems Engineers

Who is responsible?

- Ans: MWT and team.

Next Meeting : expect to have interface list.
